EDUCATION

Carleton University **Ottawa**
Honors Bachelors in Computer Science & Honors Bachelors in Cognitive Science *2023*
- Pursuing a double honors degree in Computer Science and Cognitive Science.

WORK EXPERIENCE

Department of National Defence **Ottawa**
Data Analyst Intern *January 2023 - Current*
- Currently responsible for data analysis & visualization of big data, using intelligence tools such as Power BI.
- Utilizing scripting tools within Power BI to consolidate, analyze and visualize data from multiple sources.
- Setting up data mining, data validation and data analytical processes within the auditing domain for various pilot studies conducted by the DND.

Canadian Nurses Association (CNA/AIIC) **Ottawa**
Marketing Intern *Jul - Dec 2021, Jun - Aug 2022*
- Worked closely with stakeholders, affinity partners, and academic institutions to develop membership packages and increase membership satisfaction by conducting market research surveys.
- Actively participated in consumer marketing, website redesign and decision-making for CNA's rebranding project valued at $800,000+ which included a nationwide awareness campaign and a membership drive.
- Consulted with multiple marketing agencies to drive the rebranding project while maintaining website content and strategizing membership drives.

PROJECTS AND LEADERSHIP EXPERIENCE

Google Developer Student Clubs **Ottawa**
President/Lead *Jul 2021 - Jul 2022*
- Pioneered Carleton University's first Google Developer community. Lead 3 teams of 9 members, ranging from marketing, accounting, technology, and executive teams.
- Successfully hosted events, recruited speakers, engaged with the audience, took on community projects to help establish a long term path of success for the GDSC at Carleton University.
- Spearheaded the club's direction by being the liaison between Google Developers, mentors and the student body to strategize event ideas, community projects, and membership engagement.

Cloud Coach **Ottawa**
Full Stack Developer *Sept - Nov, 2021*
- Designed and developed an intuitive user interface using ReactJS, and GatsbyJS.
- Assisted in the development and maintenance of the Cloud Coach platform using a Firebase backend.
- Helped educate 1000+ students in over 75 different institutions across North America to obtain Google Cloud badges and educate students about the fundamentals of cloud computing.

KYNZA Group **Toronto**
UI/UX Designer *Jun - Sept, 2020*
- Assisted Kynza with redesigning and rebranding their company through Logo design and UI/UX rework for their new mobile application.
- Worked closely with the Founder and Product Manager to gather requirements and create the wire-frames, and user interfaces, and built a logical and user-friendly flow.
